TWEETER

19TFF1

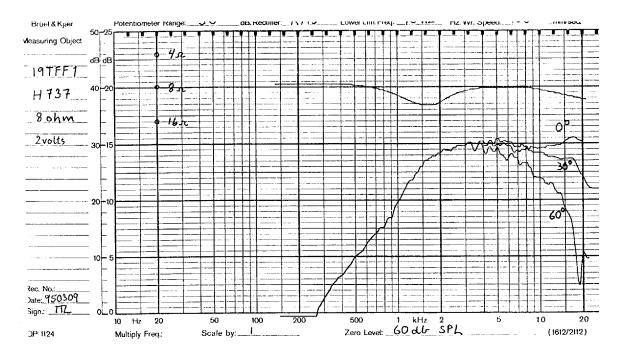

19mm High Fidelity dome tweeter with extremely smooth frequency response. The chassis is injection moulded in high grade glass fibre reinforced plastic. The diaphragm and suspension is made from a precoated fabric using a unique production method developed by SEAS. The precoating allows very tight production tolerances and high consistency. The voice coil is wound on an aluminium voice coil former with ventilating holes which eliminate problems connected with resonances in the internal cavities. The voice coil windings are immersed in magnetic fluid to increase short term power handling capacity, to reduce the compression at high power levels and to significantly reduce the Q factor.

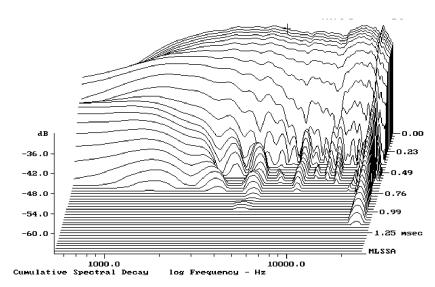

NOTES			

OCT.96 T19-501

Response curve recorded in an anechoic chamber (Free-field, 4 pi radiation) with 0.5m microphone distance. The loudspeaker is mounted in a 0.6m by 0.8m baffle.
